APPENDIX C.

SUPPLEMENTARY TABLES.

TABLE.	SUBJECT.	PAGE.
A	**Area, population, &c. of Tahsils**	492—495
B	**Cultivation, revenue and rent, &c**	496 & 497
C	**Birthplace.**—Distribution of residents by birthplace	498 & 499
D	**Birthplace.**—*Distribution of birthplaces by residence*	498 & 499
E	**Birthplace.**—Figures for towns and villages	500 & 501
F	**Migration.**—Total gain and loss by migration for districts and states	502—507
G	**Migration.**—Movement of persons between districts	508 & 509
H	**Migration.**—Movement of males and females between districts	510 & 511
J	**Future population.**—Estimate for each year from 1882 to 1891	512 & 513
K	**Municipal towns.**—Population for 1868, 1875, and 1881	514 & 515
L	**Death-rates.**—Annual death-rates for districts from 1868 to 1881	516 & 517
M	**Age.**—Distribution by age of every 10,000 males, females, and persons in each district	518 & 519

NOTE.—The emigration to "other parts of India" is taken for the whole province from the figures of the Indian Census. But the details are estimated, as explained in the report. (See § 154.) The totals do not agree exactly with the details given in the body of the report, owing to the inclusion of the figures for doubtful and unspecified birthplace.

Downloaded by Aniket Alam (International Institute of Information Technology, Hyderabad) on 09 Sep 2017 at 02:20:09

SUPPLEMENTARY TABLE F—*continued*

Showing the Gain or Loss to each District by migration.

NOTE.—Of the three rows of figures opposite the name of each district, the top row shows immigrants into that district from the other districts under whose names the respective figures stand; the middle row shows emigrants from that district into each of the other districts as before; the bottom row shows the resulting gain and loss to that district, by exchange of population with each of the other districts as before, *gain being printed in roman type and loss in italics*.

Thus, Ambala receives 348 immigrants from and sends 95 emigrants to Gurgaon, and gains 253 by the exchange. It receives 15,532 immigrants from and sends 16,353 emigrants to Karnal, and loses 821 by the exchange.

Downloaded by Aniket Alam (International Institute of Information Technology, Hyderabad) on 09 Sep 2017 at 02:20:09

SUPPLEMENTARY TABLE H.

Showing the movement of each sex separately between each two districts of the Panjab.

Note.—This table is divided into two halves by a thick black diagonal; the half above and to the right of the diagonal shows the movement of *males*; the half below and to the left of the diagonal shows the movement of *females*.

Of the three rows of figures opposite the name of each district, the top row shows immigrants into that district from the other districts under whose names the respective figures stand; the middle row shows emigrants from that district into each of the other districts as before; the bottom row shows the resulting gain or loss to that district by exchange of population with each of the other districts as before, *gain being printed in roman type and loss in italics*.

The whole movement to and from any district is contained in the pair of columns, one horizontally opposite to and the other vertically above or below the name of the district. But in reading the *vertical* column, the movement of population is reversed, the top row of figures showing emigration, the middle row immigration, roman type loss, and italics gain.

Thus, in the lower or female half of the table, Sialkot receives 10,784 female immigrants from and sends 10,983 female emigrants to Gurdáspur, gaining 199 by the exchanges. It sends 11,959 female emigrants to and receives 2,151 female immigrants from Lahore, losing 9,808 by the exchange.

In the upper or male half of the table, Sialkot receives 1,528 male immigrants from and sends 15,434 male emigrants to Lahore, losing 13,906 by the exchange. It sends 4,863 male emigrants to and receives 4,510 male immigrants from Gurdáspur, losing 353 by the exchange.

The corresponding figures for males and females for any pair of districts, lie in similar positions on opposite sides of the black diagonal.

Future Population.—Estimate for each year from 1882 to 1891.

TABLE J.

Sup. J.

Estimated population, 1882 to 1891.

1891, supposing past rates of increase to remain unchanged.

YEAR FROM 1882 TO 1891, ASSUMING PAST RATES OF INCREASE BETWEEN 1868 AND 1881 TO CONTINUE—IN HUNDREDS.

Males.										Females.										Serial No.

The published tables of the 1875 Census show Lúdhiána 36,955, Jagráon 6,893. But the figures are altered in all subsequent tables to those here given, which are obviously more correct; and it is probable that the figures were revised after publication, though no correspondence on the subject can be traced

another Census of Jahlam Municipality was taken on 10th January 1878, which gave a population of 11,319.

NOTE.—These figures represent the population within Municipal limits. The figures for 1868 are taken wherever available from the report on the Municipal Census of 1875 (*Panjab Gazette* 17th Au-5, Part I, pages 379*f*). They do not agree with those of the Census Report of 1868, as the latter are for towns and not municipalities; nor am I able to reconcile them with the figures in the Appen-ble XIX, furnished by Deputy Commissioners from the records of the Census of 1868. The figures for 1875 are taken from the corrected figures published in the Supplement to *Panjab Gazette*, uary 1877, pages 57*f*, and in some cases differ largely from those given in the Provincial Civil List, which have been commonly quoted as correct.
